

Course Overview

This course has been written by a specialist nurse following the Epilepsy Nurses Association (ESNA) best practice guidelines for training professional carers in the administration of buccal (oromucosal) midazolam. These are big and complex words and we will start with understanding what they mean.

If you are planning to take this course, we recommend that you take our "Epilepsy Awareness" course first. If you feel you have plenty of epilepsy knowledge, you could just take the assessment to check and see if there are any areas you need to refresh on.

Course Content

1. What is buccal midazolam?
2. Appropriate doses
3. Benefits of using buccal midazolam
4. Respiratory depression
5. Possible difficulties in administration
6. Potential side effects
7. Seizure Care Plan
8. Secure storage and safe disposal
9. Duty of Care
10. Practical instructions for giving buccal midazolam
11. When to seek medical help
12. Potential for misuse

Course Duration

 45 minutes

Developed in partnership with Elizabeth Lewis, qualified nurse and trainer, from Alma Care Training.
