

## Course Overview

Lone workers are people who work by themselves without close or direct supervision. There are often situations where people are working alone. This course is recommended for domiciliary care workers but the content is also relevant for other people, for example, who work in a team or a residential home, as there will always be situations where you are lone working. This course provides information for both employees and employers about lone working in health and social care work environments.

## Course Content

1. What is lone working?
2. Awareness of the legislation
3. What problems can affect lone workers?
4. How must employers control lone working risks?
5. How can employees control lone working risks?
6. Why is understanding lone working so important?
7. Supervision and performance monitoring?
8. Getting more information and useful resources?

**Course Duration** 30 minutes

**Developed** in partnership with a H&S expert.
