

## Course Overview

This course is about three of the major aspects of care you are likely to come across in your role. If you don't think all three are relevant, you should know that one in three people suffer from mental health in their lifetime, dementia is not just about older people and people can have learning disabilities without diagnosis. That's why Skills for Care have made it a requirement to cover these. This course can be used as a refresher if you have already done the Care Certificate.

## Course Content

1. How someone may feel with a Mental health condition, Dementia or Learning Disability
2. How these conditions influence a person's care needs
3. Understanding the different causes of conditions and support needs
4. How positive attitudes improve care and support
5. The social model of disability, attitudes to disability & involving people in their own care
6. Describe what adjustments in care may be needed
7. How to report concerns associated with any unmet needs
8. Explain why early detection is important
9. Examples of how and why adjustments to care and support might need to be made
10. Legislation and policies to promote human rights, inclusion & equality
11. How legislation and policies affect the day to day experiences of individuals
12. What is meant by the term "capacity"?
13. Why it is important to assume that someone has capacity
14. Explain what is meant by "consent"
15. When an assessment of capacity might be needed
