

Course Overview

Parkinson's disease is a progressive brain disorder that leads to shaking, stiffness, and difficulty with walking, balance, and coordination. Symptoms usually get worse over time and as it progresses, people may have difficulty walking and talking.

This course provides an overview of the disease to enable people to understand what it is as well as the signs and symptoms to look out for. We cover the different stages of how the disease progresses and how to care for and support an individual who has Parkinson's.

Course Content

1. What is Parkinson's disease?
2. Signs and symptoms
3. Progression
4. Diagnosis and tests
